- 1) Funding limitations listed above are established to limit the amount of state investment in one project, allowing the ability to fund as many projects around the state as possible.
The grant rounds are "competitive" and strong local investment makes a grant more competitive for approval.
- 2) Demonstration of need for equipment is necessary in all grant applications, and evaluated through the review process.
- 3) Maximum limits established for most of the equipment are based on "past practice" of grant reviews in the past six years.
- 4) "Regional" is defined as a joint effort of at least three eligible grant entities, representing at least 50,000 residents.
If a joint regional effort has less than 50,000 residents, the project can be reviewed on a case-by-case basis depending on current IDEM priorities and available funding.
- 5) Grantees awarded funding for Tub Grinder or Windrow Turner must agree to offer equipment to other communities in times of a local emergency, at the request of IDEM.
- 6) Other equipment not noted may be eligible for grant funding, but evaluated on a case-by-case basis.
Consult your regional grant manager for advice.
- 7) Equipment noted at 25% state funding level are at risk of being utilized for additional uses beyond the grant fund intent, thus a lower state investment.
